

Naval Facilities Expeditionary Logistics Center

JANUARY 04 SITREP

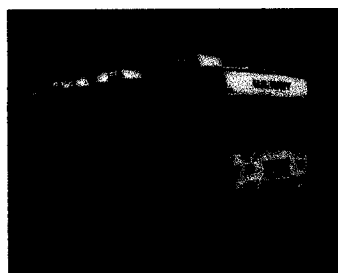

People

MUSE's CM1 (SCW) John Clanton was selected as NFELC's 2003 Sailor of the Year.

EQCM(SCW) Jose Ferriols reported aboard NFELC on 12 Jan as the new Operations Chief, and YN1(SW/AW) Sandra Anderson checked aboard on 12 Jan as NFELC's Command Yeoman.

Innovation

NFELC began the 3-M installation process aboard Camp Shields Okinawa on 25 January. The installation is expected to be complete on 20 February. Camp Shields is the second forward deployed Camp to receive the 3-M installation. Camp Covington received 3-M installation in late 2003 and Camp Mitchell will be receiving the program in Spring 2004.

The IT Department performed the Operational Acceptance Test of the new NAS Jacksonville Homeland Defense Command and Control bus 16 - 30 December 2003. The communications

systems on-board the bus were designed in-house. This is the first of a projected thirty-four such Command and Control busses that will be deployed throughout the United States to support the Homeland Defense mission.

Client

NFELC hosted the second annual Naval Construction Force (NCF) 3-M Program Review in Port Hueneme's RADM Perry Building on 12 Jan. Thirty-eight representatives from throughout the NCF attended the conference.

MUSE continued preparations to provide 45MW power plant support to Diego Garcia by conducting a pre-site inspection from 20 to 23 Jan. The power plant is expected to be installed in the May/June 04 timeframe.

GUAM MicroSNAP OMMS Install completed. Provided CDM assistance and performed CDM Data Management Oversight. Assisted in the installation of the Revised Alternative Dataflow (RAD) mailbox and downloading of the Automated Shore Interface (ASI) data.

The Logistics Department attended an annual Naval Coastal Warfare conference 27-30 Jan and made a presentation on the status of efforts to assist with improved logistics support for this community pending receipt of additional operating funds.

NFELC generic cost estimates and sample MOAs have been drafted and provided to the following clients, with an understanding that the cost estimates and MOAs can and will be tailored to meet their individual requirements:

- Forward Deployable-Preventative Medicine Unit (FD-PMU) (Resource Sponsor OPNAV N931 (BUMED))
- Fleet Hospital (Resource Sponsor OPNAV N931 (BUMED))
- Naval Expeditionary Logistics Support Force (ELSF) (Resource Sponsor OPNAV N41)
- Navy Cargo Handling Battalion ONE (NCHB1) (Resource Sponsor OPNAV N41)

Operations

On 6 January CAPT Cowell announced the Construction Equipment Division (CED) Commercial Activities (CA) Study tentative decision. The decision was to retain the function in-house and convert CED to the government's Most Efficient Organization (MEO). The competing contractor has 30 days to appeal this tentative decision. In the meantime, CED is preparing to begin the transition process, that includes initiating RIF procedures.

MUSE began installation of the remaining 8 of 12 750kW generators at La Maddalena on 20 Jan. They expect to complete the installation process by 13 Feb.

JANUARY 04 SITREP

PG. 2

NFELC continued to be heavily involved in supporting the upcoming deployment of Seabees in support of OIF II. This support includes coordinating MPF support and material procurement with an aggressive timetable.

Medical/Dental Commodity Manager attended meeting hosted by 1NCD Medical Officer to review and finalize new Dental Allowance for the P25. Meeting was held at Camp Lejune, NC 12-14 Jan 04.
